Global X Enhanced S&P/TSX 60
Index ETF

ETF Category: Enhanced Growth,
Equity Essentials

REASONS TO CONSIDER

Magnified Outcomes

Through the application of light leverage, CANL can provide 125% exposure to the Underlying Index, resulting in potentially larger gains or losses relative to the Underlying Index.

Canadian Large-Cap Exposure

The Underlying Index is the major benchmark for large capitalization Canadian equities and offers exposure to Canada's most stable companies.

Monthly Income

It is anticipated that CANL will make distributions to its unitholders on a monthly basis.

INVESTMENT OBJECTIVE

CANL seeks to replicate, to the extent reasonably possible and net of expenses, 1.25 times (125%) the performance of an index of equity securities representing the large-cap market segment of the Canadian equity market (currently, the S&P/TSX 60[®] Index). CANL will use leverage in order to seek to achieve its investment objective. Leverage will be created through the use of cash borrowings or as otherwise permitted under applicable securities legislation.

The indicated rates of return are the historical annual compounded total returns, including changes in unit/share value and reinvestment of all distributions, and do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any securityholder that would have reduced returns. Additionally, index returns do not take into account management, operating, or trading expenses. The rates of return above are not indicative of future returns. Investment funds are not guaranteed, their values change frequently, and past performance may not be repeated. The indices are not directly investible. Only the returns for periods of one year or greater are annualized returns.

DEFINITIONS

Annualized Distribution Yield: The most recent regular distribution (excluding additional year end distributions) annualized for frequency, divided by current NAV.

Management Expense Ratio: Management expense ratio ("MER") is based on total expenses, including sales tax, (excluding commissions and other portfolio transaction costs) for the stated period for each ETF and is expressed as an annualized percentage of each ETF's daily average net asset value during the period. Out of its management fees, the Manager pays for such services to the ETF as investment manager compensation, service fees and marketing.

Net Assets: The value of all assets, less the value of all liabilities, at a particular point in time. (Includes all classes of this ETF.)

Risk Rating: Risk Rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change overtime. An ETF with a low risk rating can still lose money.

12-Month Trailing Yield: The yield an investor would have received if they had held the ETF over the last twelve months stated as a percentage of the net asset value per unit on the last business day of the most recent month-end.
