## INVESTMENT OBJECTIVE

CNCL seeks to provide, to the extent reasonably possible and net of expenses: (a) exposure to the performance of the large-cap market segment of the Canadian equity market; and (b) high monthly distributions of dividend and call option income. To generate income, CNCL will be exposed to a dynamic covered call option writing program.

CNCL will also employ leverage (not to exceed the limits on use of leverage described under “Investment Strategies” in the ETFs prospectus) through cash borrowing and

The indicated rates of return are the historical annual compounded total returns, including changes in unit/share value and reinvestment of all distributions, and do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any securityholder that would have reduced returns. Additionally, index returns do not take into account management, operating, or trading expenses. The rates of return above are not indicative of future returns. Investment funds are not guaranteed, their values change frequently, and past performance may not be repeated. The indices are not directly investible. Only the returns for periods of one year or greater are annualized returns.

**DEFINITIONS**

**Annualized Distribution Yield:** The most recent regular distribution (excluding additional year end distributions) annualized for frequency, divided by current NAV.

**Management Expense Ratio:** Management expense ratio ("MER") is based on total expenses, including sales tax, (excluding commissions and other portfolio transaction costs) for the stated period for each ETF and is expressed as an annualized percentage of each ETF's daily average net asset value during the period. Out of its management fees, the Manager pays for such services to the ETF as investment manager compensation, service fees and marketing.

**Net Assets:** The value of all assets, less the value of all liabilities, at a particular point in time. (Includes all classes of this ETF.)

**Risk Rating:** Risk Rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change overtime. An ETF with a low risk rating can still lose money.

**12-Month Trailing Yield:** The yield an investor would have received if they had held the ETF over the last twelve months stated as a percentage of the net asset value per unit on the last business day of the most recent month-end.
