

REASONS TO CONSIDER

Dividend Income Focus

HAZ aims to provide investors with regular dividend income by selecting some of the world’s best dividend-paying companies that exhibit a consistent pattern of growing dividends, offering a potential source of steady cash flow through all market cycles.

Active Management

Sub-advised by Guardian Capital, HAZ is actively managed to navigate all market cycles by identifying a broader range of opportunities compared to an approach that focuses on yield alone.

Proprietary Stock Selection

Guardian’s proprietary GPS Stock Selection Process targets dividend stocks that offer a combination of Growth of dividends, Payout of cash flow, and Sustainability of the payout profile.

INVESTMENT OBJECTIVE

HAZ seeks long-term returns consisting of regular dividend income and modest long-term capital growth. HAZ invests primarily in equity and equity related securities of companies with operations located anywhere in the world.

DEFINITIONS

Annualized Distribution Yield: The most recent regular distribution (excluding additional year end distributions) annualized for frequency, divided by current NAV.

Management Expense Ratio: Management expense ratio ("MER") is based on total expenses, including sales tax, (excluding commissions and other portfolio transaction costs) for the stated period for each ETF and is expressed as an annualized percentage of each ETF's daily average net asset value during the period. Out of its management fees, the Manager pays for such services to the ETF as investment manager compensation, service fees and marketing.

Net Assets: The value of all assets, less the value of all liabilities, at a particular point in time. (Includes all classes of this ETF.)

Risk Rating: Risk Rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change overtime. An ETF with a low risk rating can still lose money.

12-Month Trailing Yield: The yield an investor would have received if they had held the ETF over the last twelve months stated as a percentage of the net asset value per unit on the last business day of the most recent month-end.
