GLOBALX.CA/HFR

Global X Active Ultra-Short Term Investment Grade Bond ETF

ETF Category: Cash and Liquidity

Annualized Distribution Yield

4.98%

REASONS TO CONSIDER

High-Grade Corporate Bond Exposure

HFR is a high-grade corporate bond ETF designed to pay a higher yield as interest rates rise thereby reducing the potential impact of interest rate fluctuation on the market value of the ETF.

Reduced Duration

HFR will hedge the portfolio's interest rate risk to generally maintain a portfolio duration of less than one year. Investors can use HFR in combination with existing bond holdings to help lower the overall interest rate sensitivity of their portfolios.

Interest Rate Risk Reduction

Through interest rate swap agreements, HFR effectively hedges against rising interest rates by exchanging a fixed rate for a floating rate, potentially offering investors downside price protection while still benefiting from higher yields.

KEY INFORMATION

Currency	CAD
Currency Hedging	Seeks to hedge the U.S. dollar value of its portfolio to the Canadian dollar at all times
Net Assets	\$399,082,767

RISK RATING

Low

INVESTMENT OBJECTIVE

HFR seeks to generate income that is consistent with prevailing Canadian short term corporate bond yields while reducing the potential effects of Canadian interest rate fluctuations on HFR. HFR invests primarily in a portfolio of Canadian debt (including debt-like securities) directly, and hedges the portfolio's interest rate risk by maintaining a portfolio duration that is not more than one year. HFR may also invest directly in debt of U.S. companies, as well as indirectly through investments in securities of Listed Funds. HFR uses derivatives, including interest rate swaps, to deliver a floating rate of income.

The indicated rates of return are the historical annual compounded total returns, including changes in unit/share value and reinvestment of all distributions, and do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any securityholder that would have reduced returns. Additionally, index returns do not take into account management, operating, or trading expenses. The rates of return above are not indicative of future returns. Investment funds are not guaranteed, their values change frequently, and past performance may not be repeated. The indices are not directly investible. Only the returns for periods of one year or greater are annualized returns.

DEFINITIONS

Annualized Distribution Yield: The most recent regular distribution (excluding additional year end distributions) annualized for frequency, divided by current NAV.

Management Expense Ratio: Management expense ratio ("MER") is based on total expenses, including sales tax, (excluding commissions and other portfolio transaction costs) for the stated period for each ETF and is expressed as an annualized percentage of each ETF's daily average net asset value during the period. Out of its management fees, the Manager pays for such services to the ETF as investment manager compensation, service fees and marketing.

Net Assets: The value of all assets, less the value of all liabilities, at a particular point in time. (Includes all classes of this ETF.)

Risk Rating: Risk Rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change overtime. An ETF with a low risk rating can still lose money.

12-Month Trailing Yield: The yield an investor would have received if they had held the ETF over the last twelve months stated as a percentage of the net asset value per unit on the last business day of the most recent month-end.

For more information, please refer to the Fund's Annual or Interim Management Reports of Fund Performance and visit its web page.

Commissions, management fees, and expenses all may be associated with an investment in products (the "Global X Funds") managed by Global X Investments Canada Inc. The Global X Funds are not guaranteed, their values change frequently and past performance may not be repeated. Certain Global X Funds may have exposure to leveraged investment techniques that magnify gains and losses which may result in greater volatility in value and could be subject to aggressive investment risk and price volatility risk. Such risks are described in the prospectus. The Global X Money Market Funds are not covered by the Canada Deposit Insurance Corporation, the Federal Deposit Insurance Corporation, or any other government deposit insurer. There can be no assurances that the money market fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the Funds will be returned to you. Past performance may not be repeated. The prospectus contains important detailed information about the Global X Funds. **Please read the relevant prospectus before investing.**

This communication is intended for informational purposes only and does not constitute an offer to sell or the solicitation of an offer to purchase investment products (the "Global X Funds") managed by Global X Investments Canada Inc. and is not, and should not be construed as, investment, tax, legal or accounting advice, and should not be relied upon in that regard. Individuals should seek the advice of professionals, as appropriate, regarding any particular investment. Investors should consult their professional advisors prior to implementing any changes to their investment strategies. These investments may not be suitable to the circumstances of an investor.

Global X Investments Canada Inc. ("Global X") is a wholly owned subsidiary of Mirae Asset Global Investments Co., Ltd. ("Mirae Asset"), the Korea-based asset management entity of Mirae Asset Financial Group. Global X is a corporation existing under the laws of Canada and is the manager, investment manager and trustee of the Global X Funds.
