Global X Mid-Term
Government Bond Premium
Yield ETF

ETF Category: Enhanced Income

Estimated Initial Monthly Distribution**

\$0.13

REASONS TO CONSIDER

Targeted Mid Duration

Rules-based selection and rebalancing of government debt securities, primarily issued by the Government of Canada, generally targeting a duration between five and ten years.

High Monthly Distributions

Designed to provide a consistent monthly interest income and option premiums.

Active Options Program

Seeks to mitigate downside risk and enhance income potential by dynamically adjusting put and call coverage in response to market conditions.

INVESTMENT OBJECTIVE

PAYM seeks to provide: (a) exposure to the performance of government debt securities, primarily issued by the Government of Canada, generally targeting a duration between five and ten years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, PAYM will employ a dynamic option program. PAYM seeks to hedge any foreign currency exposure back to the Canadian dollar.

DEFINITIONS

Annualized Distribution Yield: The most recent regular distribution (excluding additional year end distributions) annualized for frequency, divided by current NAV.

Management Expense Ratio: Management expense ratio ("MER") is based on total expenses, including sales tax, (excluding commissions and other portfolio transaction costs) for the stated period for each ETF and is expressed as an annualized percentage of each ETF's daily average net asset value during the period. Out of its management fees, the Manager pays for such services to the ETF as investment manager compensation, service fees and marketing.

Net Assets: The value of all assets, less the value of all liabilities, at a particular point in time. (Includes all classes of this ETF.)

Risk Rating: Risk Rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change overtime. An ETF with a low risk rating can still lose money.

12-Month Trailing Yield: The yield an investor would have received if they had held the ETF over the last twelve months stated as a percentage of the net asset value per unit on the last business day of the most recent month-end.
